Experienced in Java, Python, PHP, Javascript, Node, Swift, Android and most widely used frameworks in these languages. Experience as scrum master and product owner, backlog and project management as well as guidance of software developers and trainees. Master in Computer Science.

Experience

Senior Software Developer @ VodafoneZiggo

sept 2025 - present

- Development of the Vodafone & Ziggo App
- Frontend development in React Native Expo
- Backend development in Node, [Nest.js](#)
- Implementation of contract renewal and acquisition flows for consumer and business customers
- Implementing Firebase Analytics, Salesforce integration and Adyen payment integration

Senior Software Developer @ Envalue Real Estate

oct 2024 - sept 2025

- Development of a client portal for managing real estate portfolio's, automated valuation processes and more
- Implementation of REST Services and valuation calculation models in Python with FastAPI.
- Implementation of an OAuth2 server for authentication
- Setup CI/CD Pipelines with Github Actions
- Implemented and managed infrastructure with, Docker and Google Cloud Kubernetes
- Setup logging with Redis, Logstash and Elastic Cloud

Senior Software Developer @ Kate Innovations

june 2024 - oct 2024

- Development of a REST API for collecting data points from multiple sources for the real estate market in Python with FastAPI
- Architecture design and restructuring existing code.
- Code optimizations by using asynchronous execution.
- Integration tests

Lead Software Developer @ xel

june 2016 - june 2024

- Development of a website generator that uses the ChatGPT API.
- Process optimization using asynchronous message processing with RabbitMQ
- Development of an IntelliJ plugin for code generation in Java.
- Development of backend systems for website hosting and domain registrations, including Oauth2 Authentication Server

- Frontend development for Control Center with TypeScript / React
- Mobile App development with React Native.
- Integration tests with Cypress en Detox
- Performance tests with Scala Gatling
- Migration from monolithic legacy system to microservices architecture.
- Setup CI/CD with Jenkins, Gitlab CI, Docker and AWS
- Scrummaster, product owner and project management responsibilities

Medior Java Developer @ Bol.com

feb 2013 - june 2016

- Development on Bol.com website and Seller Dashboard order processing. Backend and Frontend development.
- Development of microservices with Java Spring
- Integration and performance tests and CI Pipelines for microservices. Java Cucumber, Scala Gatling, Jenkins.
- Supporting Software architects and contributing to architectural decisions

Junior Java Developer @ BSL Computer Consultancy

okt 2010 - feb 2013

- Development of web applications in PHP and Java
- Development of widgets for the new bibliotheek.nl website in Java.
- Development of multiple Android Apps.

Visiting Research Scholar @ ICS University of California, Irvine

feb 2009 - oct 2009

- Thesis project for Master Content and Knowledge Engineering
- Research on distributed software development and its influence on software development processes
- Implementation of a software collaboration tool using the Google Maps API
- Statistical analysis of case data and reporting of findings in Thesis=

Education

Master Content and Knowledge Engineering,
Fac. Information Science

Universiteit Utrecht
2007 - 2010

Bachelor of Science In Computer Science

Universiteit Utrecht
2002 - 2007

VWO

College Blaucapel / Dudok College
1995 - 2001
